

DIGITAL MOBILE FORMS

Build Forms for Any Type of Job: Field Work, Inspections, Surveys, Plant Rounds, and More

Go paperless with a 100% configurable solution to effortlessly build digital mobile forms, with Mobile Forms Pro by Field Squared. It's easy to be up and running, using our mobile forms builder. Simply drag and drop. You're just a few steps away from digital mobile data collection bliss.

Capturing sensitive health information? We have you covered, we're HIPAA compliant.

100% Configurable

Create digital mobile forms in minutes for any data collection needs, such as inspections, site surveys, JSA safety checklists, plant rounds, and more.

GPS Location Tracking

Know the who, what, where and when data was collected, since all forms are tagged with both GPS location, user and time.

Photo Capture and Barcode Scanning

Easily snap a photo, upload an image or scan a barcode directly into a form. Leverage native markup tools to add text, shapes and callouts.

Integrates with Other Systems

Connect your third-party systems, including Google, Dropbox, Box, and OneDrive. Or, leverage our OpenAPI.

Offline Data Collection

No connection, no problem. Collect data from anywhere, including remote locations. All changes sync automatically when connection is restored.

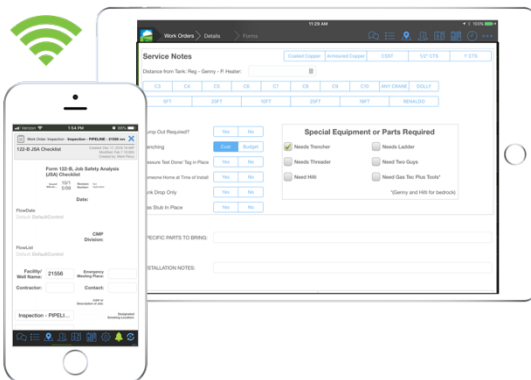

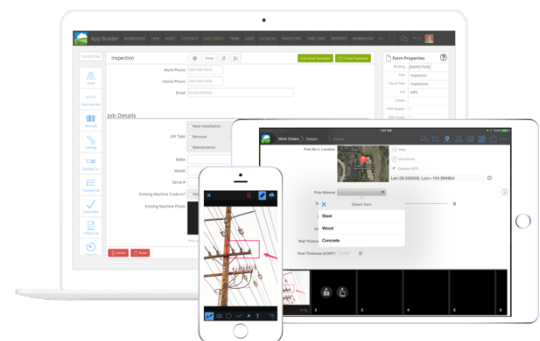

Reporting and Analytics

Report across your data for key insights and trends over time. You can also export data to Word, PDF or Excel and third-party systems for further analysis.

Easy to Use, Simply Drag and Drop

Effortlessly create powerful, feature-rich digital forms in minutes with our intuitive drag and drop environment. Any data collection needs you have are a snap, with a library of more than 60 fields or controls, as we refer to them. You get near-endless possibilities.

Unlimited forms. Unlimited storage. Unlimited submissions. All plans.

Collect Data Anywhere, Anytime from a Mobile Device, including Offline

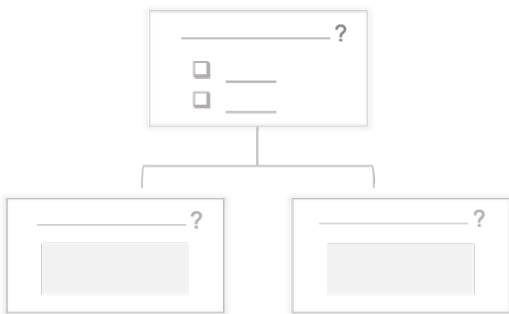

Never be without the ability to collect data while on the go. With our native iOS and Android mobile apps, you're always connected, ready to collect data all times—offline included. All changes are automatically synced when your connection is restored. No loss of data, ever.

The *Everything-and-Anything* Form Features for Incomparable Mobile Data Collection

From skip logic, rules, image capture and automation, going paperless with digital mobile forms is a drag and drop away. Building flexible, powerful mobile forms is easy in our intuitive forms builder. In fact, it's as easy as create, design and publish.

A Form for Any Industry, Any Data Collection Need

We get it, one size doesn't fit all when it comes to mobile data collection. We're flexible across any industry, any type of data collection need. Period.

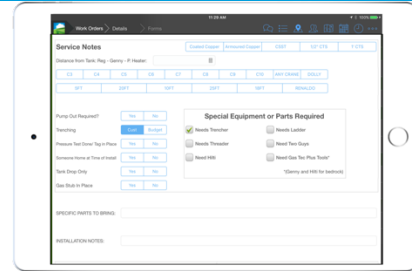

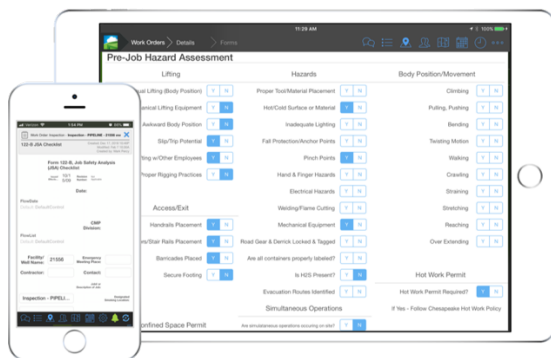

Take Your Industry-Specific Data Collection to the Next Level

Every industry has unique data collection needs that require specific mobile forms to get the job done, including

Oil & Gas Services – Plant rounds and environmental inspection forms

Telecommunications – Tower installations, network maintenance or upgrades, and switch activities

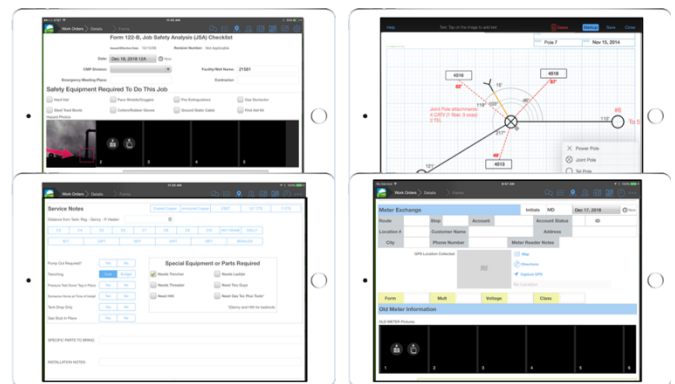

Utilities Services – Meter installations, upgrades, installs/disconnects, and maintenance

Drive Efficiency with Logic and Rules

Add skip logic and branching to quickly move through a form, only presenting the next field based upon data entered in the previous field. Irrelevant fields are hidden to the user, so they never see them.

Incorporate rules, processes and calculations based on criteria you specify, such as the type of form, or other factors, to improve data collection efficiency.

Provide the Right Tools for Maintenance or Installation Jobs

Mobile Forms Pro offers flexible capabilities to quickly capture details for any given job.

- Include calculations for such things as parts and labor
- Generate quotes and invoices
- Take readings or scan barcodes
- Set up reminders via automated workflows
- Build simple to complex checklist-type forms
